**Location:** Bangalore, India

**Languages:** Hindi, English

**Email**: atur.iitbhu@gmail.com | **Mobile**: +917210861511

**Education:** B.Tech - Electrical Engineering - IIT-BHU - 2013 Batch

---

## Professional Summary

Senior Technical Product Manager with strong backend engineering expertise and hands-on experience building scalable, AI-driven systems. Led and coordinated cross-functional teams of 100+ engineers, product, and operations to deliver high-scale platforms, automate core workflows, and improve system reliability and performance.

Co-founder of a funded real-estate startup with end-to-end ownership of 0-1 product, architecture, and execution. Active open-source contributor and creator of atom, a production-ready backend framework that cuts development time by ~50% and is designed for large-scale, high-throughput applications.

Focused on using AI, automation, and scalable system design to build reliable products, scale teams, and drive long-term business impact.

Open to senior product and technical leadership roles to build high-impact products at scale.

---

## Core Skills

1. AI & Technical Product Development
2. Distributed Systems & Database Architecture
3. Product Strategy & Roadmapping
4. Agile Delivery, SDLC & Process Optimization
5. Metrics, OKRs & Stakeholder Leadership

## Technical Skills

1. Distributed system design, microservices architecture, APIs design
2. Event-driven architectures using Kafka, RabbitMQ, Redis, Celery
3. Data modeling, consistency patterns, sharding, caching, vector stores
4. LLM system design: agentic workflows, RAG pipelines, embeddings, orchestration
5. Observability-driven design: monitoring, logging, tracing, performance tuning

## Achievements

1. Self taught Programmer
2. Written an open-source backend called atom
3. Founded a funded real-estate startup

# Experience

**Leader Group - Senior Technical Product Manager - Bengaluru - 04/2025 to 02/2026**
- Managed delivery of products: analytics platform, document management system, IoT-based vehicle tracking system and CMS system..
- Designed and built multiple AI-driven solutions including PDF-based RAG systems, conversational chatbots, and automated resume evaluation pipelines, taking them from PoC to production.
- Drove agile execution and delivery excellence through resource planning, sprint/process setup, and continuous stakeholder communication with regular reporting and alignment.

**KaptureCX - Senior Technical Product Manager - Bengaluru - 07/2023 to 06/2024**
- Led product development for the consumer durables sector managing enterprise clients like Onida, Philips, and Bajaj.
- Streamlined client delivery by aligning product roadmaps with business objectives and process flows.
- Implemented agile methodologies to adapt to market needs, ensuring seamless go-lives and delivering scalable solutions that exceeded customer expectations.

**Anar - Technical Product Manager - Remote - 07/2021 to 07/2022**
- Led the execution of internal tools like Appsflyer, Jira, Retool, and Zoho, enhancing operational efficiency.
- Managed the engineering team to deliver product roadmap milestones, and implemented Agile-aligned QA processes.
- Developed adoption strategies, monetization features, and operational dashboards using Retool, JavaScript, REST APIs, and SQL.

**Doubnut - Product Manager - Gurgaon - 11/2019 to 08/2020**
- Led the development and launch of zero-to-one features, including games, social community, bounty, and monetization, increasing engagement by 100%+.
- Successfully introduced the app's first monetization feature, driving revenue growth.
- Contributed to live classes and recorded video features, enhancing user experience.

**Loconav - General Manager, Gurgaon - 10/2018 to 09/2019**
- Played a key role in scaling operations and driving strategic initiatives to propel growth at a $50M+ funded startup.
- Led the development and implementation of data-driven strategies, setting up BI workflows, dashboards on Zoho One, and building a high-performing BI team.

**Magicpin – Senior Manager - Gurgaon - 11/2017 to 10/2018**
- Played a key role in scaling operations and driving strategic initiatives at a $50M+ funded startup.
- Implemented efficient partner operations and increased company NPS to over 50.
- Developed internal tools and workflows from scratch on platforms like Freshdesk and Exotel.

**FlatHood - CoFounder – Delhi - 09/2015 to 08/2017**
- Founded and raised angel funding for a real estate firm focused on making housing affordable.
- As CEO, I led strategic initiatives across property acquisition, development, leasing, and sales, establishing over 500 homes in Delhi-NCR.
